COMPANY PROFILE

www.hyalineenviro.com

HYALINE ENVIRO ENGINEERS PVT LTD.

QUALITY ENSURED

**Reduce, Recycle
& Reuse Water for
future sustainability to
Protect the
Environment**

**End-to-end fabrication services engineered for dependable performance, high efficiency, and lasting structural strength
Hyaline Enviro.**

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Tel.: 040-27230374/040-27230333/ Mobile: 9553753337/7981123366.

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

Hyaline Enviro Engineers Pvt. Ltd., Hyderabad, India is pioneer in water treatment and waste water management. We are ISO 9001:2015 and CE certified company,

We do Design, Engineering, Erection and Commissioning of water treatment, water purification plants and projects on EPC and Turnkey basis. Hyaline Enviro is the gateway to solutions for water treatment and waste water management.

HYALINE Enviro has expertise to organize, manage and successfully implement the projects, irrespective of the size complexity and ensures that all projects are executed as per schedules to reach customer's satisfaction. **HYALINE ENVIRO** is customer- centric and has “no- quality-compromise” policy.

Design, fabrication, and erection of MS & SS industrial structures
Fabrication of water and wastewater treatment equipment and vessels
Custom fabrication of tanks, pressure vessels, and process equipment
Structural fabrication for platforms, supports, and pipe rack
Upgradation and modification of existing fabricated systems

Hyaline enviro is a leader in design, Engineering, of advanced water and waste

Water treatment system in India

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

Hyaline Enviro is started by team of professionals, experienced in various streams of water treatment, such as Chemical Engineering, Mechanical Engineering, Electrical Engineering and Bio Technology; Our Top Management team has combined experience of 100 years.

Hyaline Enviro has experienced and skilled manpower for design, engineering, manufacture installation & commissioning, proficient in their respective discipline

Mr. Naresh Reddy Tumu is the **CEO** and has more than **decade** experience in water management business. He has dealt water management projects for some of India's largest companies and PSU's. He worked with several thermal projects of Reliance, NTPC; Hotel majors like Taj Group, Novotel and Sarovar Group; Cement companies like Oriental cements, Sagar cements; Pharma majors such as Bharath bio-tech, vision drugs; Power plants like L&T power, NTPC Mouda, Ideal Power, RosaThermal His outstanding execution experience with various industry majors helps the company to grow leaps and bounds.

Mr. G. Hari Prasad is the **Executive Director** with over **27** years of experience in designing of projects relevant to water treatment and waste water management. He has played major roles in executing projects for industry majors such as Reliance Power , NTPC, Dr.Reddys, RanBaxy, DRDO; Chemical, Pharma and Paper industries. He has superior knowledge in design of Pharma grade DM plants, High Purity DM Plants, Automated RO Plants, STP, ETP, PTP and Gas Chlorination Systems.

Hyaline Enviro has
proven best
fabrication high
quality SS&MS
ensuring dimension
al accuracy.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Tel.: 040-27230374/040-27230333/ Mobile: 9553753337/7981123366.

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

Mr. N. Yashwant Reddy is the **Director**. He has **13 years** of experience in PIPE designing, **STP&ETP** plant designing, RO plants and also **GAS CHLORINATION SYSTEM** designing. He has played major roles in executing projects for industry majors such as like L&T power, Reliance, Dr.Reddy's, Nvidia Graphics, Bharath bio-tech ,and many more

Mr. Dasari Ravi Kiran is the Director of the organization and brings over **10 years of extensive experience** in finance and infrastructure sectors. He possesses a strong track record in **planning, managing, and executing multiple projects** across diverse industries. His expertise spans **project planning, financial control, budgeting, procurement, contract management, and end-to-end project execution**, ensuring projects are delivered **on schedule and within budget**

Water scarcity is the lack of sufficient available water resources to meet the demands of water usage within a region. It already affects every continent and around 2.8 billion people around the world at least one month out of every year.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Tel.: 040-27230374/040-27230333/ Mobile: 9553753337/7981123366.

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

Hyaline Enviro has all the requisite expertise and technical strengths to offer “**One Stop Solution**” for the clients in this sector.

We provide wide range of water treatment equipment and services to various industries mainly, pharmaceutical industry, Chemical manufacturing industry, Food processing industry, Thermal power plants, Paper industry, Beverage Processing industry, Hotel industry, Residential houses...

Hyaline Enviro also provides turnkey solutions for waste water treatment facilities with exclusive operation and maintenance services. In addition to this we also offer water treatment chemicals, **spares and service** for the respective jobs.

OUR COMPANY TURNKEY PROJECTS ARE'

PRE ENGINEERED BUILDING STRUCTURES(PEB)

PEB Structures (Pre-Engineered Buildings) are steel structures designed and fabricated in a factory and assembled on-site. They consist of primary frames, secondary frames, roof and wall panels, and bracings. PEBs are strong, lightweight, cost-effective, and quick to construct, making them ideal for warehouses, factories, workshops, and industrial sheds.

Hyaline Enviro Engineers Pvt. Ltd.

Solar Mounting Structures

Solar Mounting Structures are specially designed frameworks used to support solar panels at the optimal angle for maximum sunlight exposure. They are typically made of **galvanized steel or aluminium**, providing strength, durability, and resistance to harsh weather conditions. These structures ensure the solar panels remain stable, safe, and efficient over their lifespan.

There are different types of solar mounting structures, including **fixed tilt, rooftop, ground-mounted, and tracking systems**. Fixed tilt and rooftop structures are simple and cost-effective, while tracking systems follow the sun to maximize energy output. These structures are essential for both small-scale rooftop installations and large solar farms, offering flexibility, durability, and improved solar power generation.

Hyaline Enviro Engineers Pvt. Ltd.

Compressed Biogas (CBG) Piping& Compressed Biogas (CBG) Piping:

Compressed Biogas (CBG) Piping involves the safe transportation of biogas from the production unit (biogas plant) to storage or dispensing points. The piping system is typically made of **MS, SS, or HDPE pipes**, designed to handle high pressure and prevent leaks. Proper valves, fittings, and pressure regulators are installed to ensure smooth flow and safety. Leak-proof connections and corrosion-resistant materials are critical to avoid accidents and maintain system efficiency.

Firefighting systems for CBG facilities are essential due to the flammable nature of biogas. These systems include **fire hydrants, sprinklers, gas detectors, foam systems, and emergency shut-off valves**. Regular safety checks, proper layout, and adherence to standards ensure quick response in case of fire, protecting personnel, equipment, and the environment. Together, a robust piping network and firefighting system make CBG plants safe and operationally reliable.

Structural and steel fabrication

Hyaline Enviro has proven technical capability in structural and steel fabrication, delivering high-quality MS and SS structures designed for strength, precision, and long-term performance. The company specializes in the fabrication of platforms, pipe racks, supports, tanks, and customized steel structures, executed as per approved drawings and relevant industrial standards. All fabrication works follow strict quality control, proper welding procedures, and dimensional accuracy, ensuring safe installation, durability, and reliable operation in industrial and process plant environments.

CONSTRUCTION OF CIVIL & INFRASTRUCTURE

Hyaline Enviro undertakes constructional and fabrication works for industrial and infrastructure projects, delivering structurally sound and precision-engineered solutions. The scope includes civil-associated steel works, MS and SS fabrication, platforms, supports, pipe racks, tanks, and customized structures. All works are executed as per approved drawings, quality standards, and safety norms to ensure durability, reliability, and efficient site execution.

Hyaline Enviro Engineers Pvt. Ltd.

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

AIR RECEIVING TANKS:

Air Receiving Tanks are pressure vessels used in compressed air systems to store air produced by compressors. They act as a buffer between the compressor and the end-use equipment, ensuring a **steady supply of air at a consistent pressure**. These tanks help reduce compressor cycling, remove moisture and oil from the air, and improve the overall efficiency and lifespan of the system.

Air receiving tanks are typically made of **MS or SS steel** and are designed according to relevant **pressure vessel codes and safety standards**. They are installed with safety valves, pressure gauges, and drain valves for maintenance and safety. Widely used in **industrial plants, manufacturing units, and process industries**, these tanks are essential for reliable and efficient compressed air distribution.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

SS 310 Heat Treatment Baskets

. **SS 310 Heat Treatment Baskets** are specially designed containers made of **Stainless Steel 310**, a high-temperature resistant alloy, used to hold metal parts or components during heat treatment processes. These baskets allow uniform heating and cooling of the parts while ensuring proper airflow and preventing distortion or contamination. They are widely used in **furnaces, kilns, and other thermal processing equipment** in industries like automotive, aerospace, and manufacturing.

The baskets are fabricated with **high-strength wire mesh or perforated sheets**, providing durability, corrosion resistance, and long service life under extreme temperatures. Their design ensures easy loading and unloading of parts, efficient heat transfer, and safe handling, making them essential for consistent, high-quality heat treatment operations.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Tel.: 040-27230374/040-27230333/ Mobile: 9553753337/7981123366.

Mail: info@hyalineenviro.com / sales@hyalineenviro.com | Web Site: www.hyalineenviro.com

Pressure vessels (MS&SS):

Pressure Vessels are specially designed containers used to store gases or liquids under high pressure safely. They are critical in industries like chemical, petrochemical, oil & gas, and water treatment. Pressure vessels made of **MS (Mild Steel)** are cost-effective and suitable for lower corrosion environments, while **SS (Stainless Steel)** vessels offer excellent **corrosion resistance, durability, and hygiene**, making them ideal for food, pharma, and chemical industries.

These vessels are engineered according to strict **design codes and safety standards**, such as ASME, to withstand internal pressure, temperature variations, and external forces. They are equipped with **safety valves, pressure gauges, and drain outlets** for safe operation. Proper fabrication, testing, and maintenance ensure the vessel's longevity, efficiency, and safety in industrial applications.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Effluent & Sewage Treatment Plant (ETP & STP) Structures

ETP & STP Structures are the civil and structural components of wastewater treatment systems used to treat industrial effluent (ETP) and domestic sewage (STP). These structures include **collection pits, grit chambers, equalization tanks, aeration tanks, clarifiers, and sludge handling units**. They provide the necessary framework for water to flow through various treatment stages, ensuring proper sedimentation, biological treatment, and clarification.

The structures are typically made of **reinforced concrete, MS, or HDPE materials**, designed for durability, leak-proof operation, and resistance to chemical and biological corrosion. Properly designed ETP & STP structures ensure smooth operation, maintain environmental compliance, and protect equipment while providing safe and efficient wastewater treatment for industrial and municipal applications.

Hyaline Enviro Engineers Pvt. Ltd.

Plot No. #61/P, Road No. 1/C, Green Park Avenue, Besides Chennai Shopping Mall,
Suchitra Circle, Hyderabad - 500067.Telangana. India

Reactor & Jacketed Tanks (SS & MS)

Reactor Tanks are vessels used in chemical, pharmaceutical, and food industries to carry out controlled chemical or biological reactions. They are designed to handle specific temperatures, pressures, and mixing requirements. **Jacketed Tanks** are a type of reactor or storage tank with an outer jacket that allows heating or cooling fluids to circulate, maintaining precise temperature control for the process.

These tanks are commonly made of **Stainless Steel (SS)** for corrosion resistance and hygiene, or **Mild Steel (MS)** for cost-effective applications in less corrosive environments. They are equipped with **inlets, outlets, agitators, and safety valves** as needed. Proper design and fabrication ensure durability, process efficiency, and safe operation in industrial applications.

Hyaline Enviro Engineers Pvt. Ltd.

Gas Piping Fabrication

Gas Piping Fabrication involves the design, cutting, welding, and installation of pipelines used to transport **LPG (Liquefied Petroleum Gas)** or **Natural Gas** safely from storage to end-use points. The piping system is carefully engineered to handle **high pressure, prevent leaks, and ensure smooth flow**. Materials commonly used include **MS, SS, or HDPE pipes**, selected based on pressure, temperature, and corrosion resistance requirements.

Safety is the most critical aspect of gas piping. Systems are equipped with **valves, regulators, joints, and leak detection mechanisms** to prevent accidents. Proper fabrication, testing, and compliance with safety standards ensure reliable operation in **industrial plants, commercial facilities, and residential setups**, minimizing risks and ensuring uninterrupted gas supply.

Quenching tanks

Hyaline Enviro designs and fabricates high-quality quenching tanks for heat treatment applications, ensuring safe, efficient, and controlled quenching operations. The tanks are fabricated using MS or SS with robust structural design, proper reinforcement, and leak-proof construction to withstand thermal and mechanical stresses. Each quenching tank is manufactured as per customer specifications and industrial standards, ensuring durability, operational safety, and long service life.

Rectangular tanks

Hyaline Enviro designs and fabricates rectangular tanks in MS and SS for water, wastewater, and industrial process applications. The tanks are engineered with proper stiffeners and supports to ensure structural stability, leak-proof performance, and long service life. Fabrication is carried out as per approved drawings and relevant standards, with options for internal linings, corrosion protection, and customized inlet-outlet arrangements.

Hyaline Enviro's Turnkey and EPC range

Water Softeners	Sewerage Treatment Plants
DM Plants	Effluent Treatment Plants
UV systems	Industrial Reverse Osmosis Systems
Electro coagulation	Pre-Treatment Plants
Ozonators	Nano Filtration Systems
Nano filtration	Ultra-Filtration Systems
Storage & Distribution	Swimming Pool water Filtration systems
	Kill tanks

Hyaline Enviro's Spares, Accessories

Cartridge Filters	Hardness Test Kit
Brine solution Tanks	Residual Chlorine Test Kit
HDPE Tanks	Activated Carbon
Dosing Tanks	Filter media (sand & pebbles)
FRP Vessels	Air duct ozone generators
Moulded Rubber Gaskets	Diaphragm valves
Rubber lined Vessels	Lamella Clarifiers
RO Membranes	Double Decker strainer buttons
UF Membranes	Hydro Pneumatic Systems
Nano Membranes	LED Watchers
Dosing Pumps	Yoke (or) Angle valves
MS Tanks	Vacuum regulators
SS Tanks	Chlorine Tonner Connectors
RO Skids	PVC Flexible Hose
Bio Pac Media For STP & ETP	oxygen concentrator
